Experience:

General Assembly: Full Software Engineering Immersive, 11/2019 to 02/2020

- 15-week, 480+ hours full-stack program conducted in a classroom setting, providing experience with the latest front and back end programming languages, tools and methodologies
- Languages: HTML, CSS, JavaScript, SASS, jQuery, PostgreSQL, MongoDB, Ruby, Ruby on Rails, Angular JS, NodeJS, ReactJS, WordPress, Git, GitHub, and Agile/Scrum
- Created 3 different projects:
 - Fixify: An app designed to connect local freelance mechanics to anyone having an issue with their car
 - App created with React and Flask
 - <https://fixify-react-app.herokuapp.com/>
 - VibeTune: An app designed to assist people in finding new music
 - App created with React and Express
 - <https://vibetune-react.herokuapp.com/>
 - Joe's Kitchen: An app designed to share recipes among users
 - App created with Express
 - <https://recipeapp5.herokuapp.com/>

General Assembly: Front End Web Development, 08/2019 to 10/2019

- Learned basics of HTML, CSS and JavaScript, forming a solid foundation
- Became proficient at building interactive, responsive websites

Booj: Implementation Specialist, 02/2018 to 06/2019

- Was Implementation Specialist for 4 separate clients
- Led Go-Live of <https://www.vailrealestate.com/>
- Managed resources of Front End Developers, Back End Developers, Design and Data departments on all projects
- Mastered both JIRA and Confluence to organize all aspects of the projects
- Worked in an Agile style workflow and ran all internal meetings for projects

Precision for Value: Project Manager, 06/2017 to 11/2017

- Ensured clear communication between account, creative, studio and production teams
- Exhibited a calm demeanor when under pressure to meet tight deadlines

Education: Graduated from Miami University (Oxford, Ohio)

- **General Assembly**, (11/2019 to 02/2020): Front-End Web Development | Full Software Engineering Immersive
- Strategic Communications Major | Entrepreneurship and General Business Minors
